

Dear Rupert

Re: FREE real PE at home access for ALL Schools

In view of the current crisis, we are all facing a very challenging time and understand the pressure on schools and families. Create Development would very much like to help as much as we can to alleviate the difficulties many families will face and we hope this offer will be of assistance.

We want to make physical activity at home widely available and as easy as possible to access. We know there are massive benefits to our physical, mental and emotional health if we remain physically active and we want to ensure that we support schools and families to create positive relationships with physical activity for life.

We are making **real PE** at home FREE for any family to access whilst schools are closed. Click [here](#) to view the **real PE** at home video to preview what this looks like.

This will be a carefully managed process including the following:

1) **Existing real PE member schools** will receive automatic FREE access whilst the schools remain closed to ensure all their families are given access to home learning online resources.

Click [here](#) to view the email that has been sent to **real PE** member schools.

2) **Open access to ANY school to real PE** at home.

We're really confident that we can support all families and are currently setting up over 6,700 of our member schools with access to the programme and are building capacity to extend this offer to all other primary, infant and junior schools. An expression of interest should be sent to jasmine@createdevelopment.co.uk

Access to other Key Stage 2 activities will also be available on the platform.

In addition to direct communication we will be promoting this via social media. We will also be providing schools and partners with basic analytics of usage to help track impact and support developments in the future.

Please share the message below with your network of schools so that they are aware of what support is available to them.

If you have any questions, please get in touch with me.

Cathy

Message to forward to schools:

In view of the current crisis, we are all facing a very challenging time and understand the pressure on schools and families. Both us and Create Development would very much like to help as much as we can to alleviate the difficulties many families will face and we hope this offer will be of assistance.

real PE at home supports families to play and learn together and includes 12 themes, 6 areas, over 250 activities and challenges, and 1000s of hours of fun and activity for every family! We really want to help ensure families have access to quality physical activity and family play opportunities. The programme is being set up on a temporary platform to make it available during school closures and will be live during this period.

We are confident that you and your families are going to enjoy playing and learning together. View the **real PE** at home video by clicking [here](#) to preview what this looks like.

real PE member schools next steps

real PE member schools will receive automatic access to **real PE** at home, online learning resources at **no additional cost** should your school need to close for an extended period. Schools should have already received an email with this information. See below for more details.

Here's the simple next steps:

1. Each school will be emailed all the details including the new website address and a unique password (single parent login for ease of use) to **Jasmine** – your real learning platform, for you to send to parents by the end of this week. It is not on your current **Jasmine** platform (if you already have access).
2. Create will supply your school with an electronic template letter/email to share with your families via your preferred method of communication.
3. **Jasmine** is very intuitive and already contains lots of guidance including extra messages and videos. Create have also created a simple guide to support families on how to use **Jasmine** if required.
4. Families can choose their own adventure or as a school you can suggest which adventure they should explore and play per day or week. Create can also send you some ideas to support this.

Non member schools next steps

We're really confident that we can support all families and are currently setting up over 6,700 of our member schools with access to the programme and are building capacity to extend this offer to all other primary, infant and junior schools. An expression of interest should be sent to **jasmine@createdevelopment.co.uk**

Kind regards

Jasmine
